WATER SOFTENERS

**MINI
WATER SOFTENER
SERIES**

The Mini-Softeners, **TIA**, **ETO**, **BLU** and **USA**

are used in coffee machines to reduce the hardness of the water and prevent the formation of limescale.

Softened water enhances the taste of coffee as well as making the life of the coffee machine longer.

BLU and USA models

contain the cationic resin to soften the water.

BLU

USA

ETO

TIA

ETO and TIA models

contain a high-efficiency mono-sphere resin to soften the water.

Installation is easy, before connecting it to the coffee machine, it will need to be rinsed with running water, connected to the suction pipe and placed on the bottom of the tank.

TECHNICAL FEATURE

MINI SOFTENER SERIES	USA	BLU	ETO	TIA
Width mm	64			
Depth mm	39
